GENERAL DESCRIPTION

The Macrotron MS988L864S-08 is a PC100 Compliant 8M bit x 64 bit Synchronous Dynamic RAM high density memory module. It consists of eight CMOS 8M x 8 bit with Synchronous DRAMs in TSOP packages and a 2K EEPROM in 8-pin TSOP package on a 144-pin glass-epoxy substrate. Decoupling capacitors are mounted on the printed circuit board in parallel for each SDRAM. The product is a Small Outline Dual In-line Memory Module and is intended for mounting into 144-pin edge connector sockets.

Synchronous design allows precise cycle controls with the use of system clock. I/O transactions are possible on every clock cycle. Range of operating frequencies and programmable latencies allow the same device to be useful for a variety of high bandwidth, high performance memory system applications.
